The Toa Reinsurance Company, Limited

Announcement of "B" Score achievement  
in CDP 2025 Climate Change Survey

The Toa Reinsurance Company, Limited (President and Chief Executive: Masaaki Matsunaga) is pleased to announce that the company has achieved a "B" score in the climate change survey by CDP, a global non-profit organization.

CDP scores consist of 8 levels (A, A-, B, B-, C, C-, D, D-), and the "B" score received this time indicates that the company is rated at the third-highest management level "Understand and act on environmental risks and impacts of the company."

"Providing Peace of Mind," as articulated in the Mission Statement, the Toa Re Group has been promoting initiatives to realize a sustainable society through all its business activities.

Amid the increasing severity of climate change and other global issues, sustainability initiatives have become a critical issue for the entire world.

The Group is committed to promoting activities to contribute to achieving sustainable society through its reinsurance business and other business activities and striving for the sustainable enhancement of corporate value, thereby contributing to the resolution of such social issues.

● About CDP

CDP is a global non-profit organization established in the UK in 2000 that runs an international environmental disclosure system. Its mission is "To surface new information, enabling Earth-positive decisions to protect future generations."
